What you can expect from Medica:

Reporting process:

All reports are provided directly back into your local reporting system. Reports are made with access to all wider patient information, reports and imaging.

Implementation:

Deployed within the standard elective reporting service. There will be a small number of actions to ensure exams are identified, reconstructed correctly and that a suitable reporting panel is applied.

Software:

All DEXA reporting is provided using RioMed's Cellma application. This allows Medica reporters to capture the key clinical information for each patient, along with the various bone densitometry outputs to provide a full, clinically relevant report to assist referrers in their management of patients with bone density conditions.

Ongoing support and service management:

- Overseen by our service development team
- Hands-on clinical leadership
- Dedicated account manager
- IT support throughout
- Monthly performance reporting

Audit:

All reporting is continuously audited. For reporters in this service the normal audit rate is 5%. Medica appoint suitably qualified and experienced auditors to review performance.

We have a friendly team of account managers based across the UK who would love to hear from you. Meetings can be held at your convenience; over the phone, video call or in person at your hospital.
