NightHawk

Emergency reporting 24/7

Fast turnaround
times

15+
YEARS

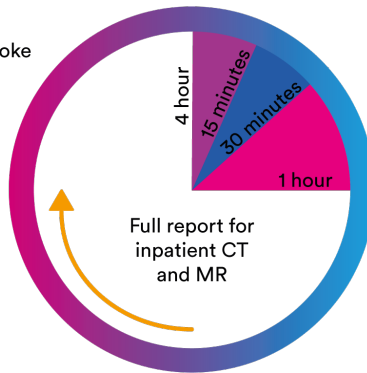

successful delivery to over
100 NHS Trusts

Delivering pioneering diagnostic support to the acute care environment. Reporting provided by a team of over 25 radiologists at peak times, and in under 30 minutes, with dedicated pathways for stroke and major trauma.

www.medica.co.uk

What you can expect from Medica:

- Primary report for Stroke and Major Trauma
- Secondary report for Stroke
- Secondary report for Major Trauma and full report for general Acute exams

Best service for patients with greatest overall value

Competitively benchmarked pricing, with trial options available. Rapid and simple set-up process.

Quality assurance

Detailed quality assurance process to monitor the standard of radiology reporting.

Optimised referral to report solution

We have designed each step from referral to scan and report to happen as quickly and efficiently as possible.

NightHawk Portal

Providing live visibility and accountability, including a record of referral justification under IR(ME)R.

Referral activity management

The NightHawk Portal is our workflow management and data capture tool. Analysis shows that hospitals who use the referral data to engage with their referring colleagues save resources, activity and ultimately cost by up to 13% per annum.

Performance reporting

Detailed and actionable data about how your teleradiology service is running, which supports continuous improvement and improved outcomes. Information is available both live and monthly.

Shared national best practice

We share best practice from the largest out of hours client base in the UK, to support ongoing enhancement of the service to patients.

We have a friendly team of account managers based across the UK who would love to hear from you. Meetings can be held at your convenience; over the phone, video call or in person at your hospital.
