What you can expect from Medica:

Radiologist credentialing criteria:

All our specialist reporters are required to evidence regular CPD, MDT attendance and contributions to lectures and articles every 12 months. Personalised training is provided to all reporters for the relevant advanced visualisation software associated with each specialist service.

- Level II or above Cardiac CT training
- Cardiac MDT attendance

Reporting process:

All reports are provided directly back into your local reporting system. Reports are made with access to all wider patient information, prior reports and imaging. Where required, reconstructed images can be transferred back to your PACS. There is an effective pathway for immediate communicating of urgent findings.

Software:

Medica use TeraRecon iNtuition for reporting Cardiac CT. This is fully integrated with the Medica PACS and provides a seamless experience for reporters to access to wide range of advanced visualisation tools the solution provides.

Implementation:

Deployed within the standard elective reporting service. There will be a small number of actions to ensure exams are identified, reconstructed correctly and that a suitable reporting panel is applied.

Audit:

All reporters involved in providing cardiac reporting are audited to a minimum of 5%. Medica appoint suitably qualified and experienced auditors to review performance.

We have a friendly team of account managers based across the UK who would love to hear from you. Meetings can be held at your convenience; over the phone, video call or in person at your hospital.
