

medica: Specialist

Clinically specialised, timely and responsive reporting.

Fast turnaround
times

20
YEARS

successful delivery to over
100 NHS Trusts

All the features and benefits of our Elective reporting provided by highly specialised reporters, covering a growing number of areas.

What you can expect from Medica

Fast turnaround times

Reports provided reliably within agreed and clinically appropriate timeframes.

Quality assurance

Detailed quality assurance process to monitor the standard of radiology reporting.

Capacity to meet your needs

Over 500 reporters with an internationally growing team, providing the reporting you need, when you need it.

Access to patient information

Reports created with access to all wider patient information, reports and imaging without the need for involving local hospital staff.

Dedicated advanced visualisation software

Optimal appropriate software packages have been selected and configured to support each specialist service.

Cardiac CT

Reporting of CT coronary artery calcium scoring, angiography and TAVI, for the assessment of structural heart disease and congenital heart disease, using TeraRecon software for image viewing.

Radiologist credentialing criteria:

- Level II or above cardiac CT training
- Cardiac MDT attendance

PET CT and Nuclear Medicine

Reporting of PET CT, lung ventilation and perfusion, renal, bone, thyroid, octreotide and brain perfusion scans using Mirada software and working under the delegation of the local ARSAC licence holder.

Radiologist credentialing criteria:

- Specialist PET CT/NM training - dual training preferred
- MDT attendance
- Preferred ARSAC licence holder
- Completion of written PET CT experience assessment

DEXA

DEXA reporting with full lifestyle recommendations delivered by consultant rheumatologists using Cellma software.

Radiologist credentialing criteria:

- Rheumatologist/dual trained radiologist
- Specialist DEXA training

MR Prostate

Dual and multiparametric analysis reporting of prostate MRI to the latest PIRADS standards using TeraRecon software.

Radiologist credentialing criteria:

- Specialist multiparametric MR prostate training to latest PIRADS standard
- Urology MDT attendance
- Completion of written mpMR prostate experience assessment

“The service provided by Medica has been highly responsive and delivered with the utmost professionalism and tailored to our specific needs.”

Simon Harvey, Head of Diagnostics, BMI Healthcare

**Patient first
and truly
collaborative**

CT Cone Beam

Undertaking reporting for maxillofacial and dental referrals from both NHS hospitals and smaller dental practices.

Radiologist credentialing criteria:

- Specialist training - ENT/head and neck reporting
- MDT attendance

CT Colonography

Reporting of symptomatic CT Colonography examinations (CTC) based upon recognised standards and using TeraRecon software.

Radiologist credentialing criteria:

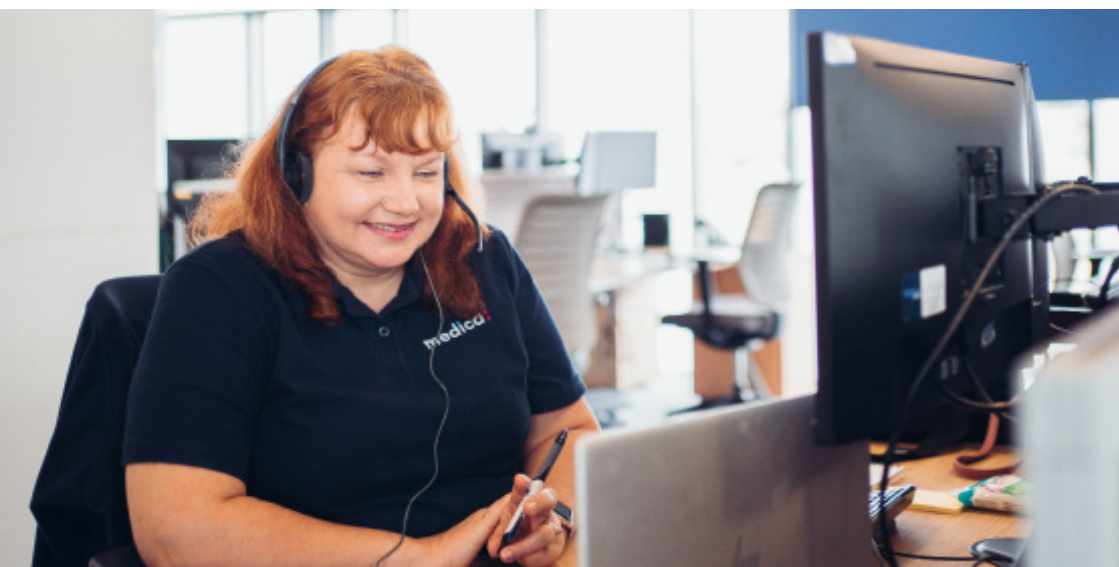

- Specialist CTC training
- NHS BCSP accreditation
- Lower GI/Colon MDT attendance

Audit

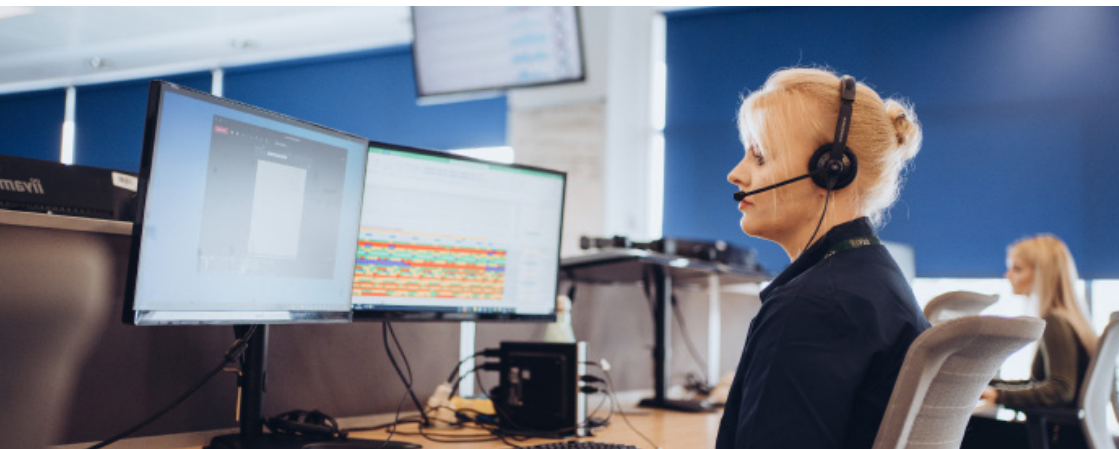

Independent audit services including cause for concern, departmental quality assurance and ongoing audit services.

Radiologist credentialing criteria:

- A low personal discrepancy rate
- Track record of efficient and appropriate communication skills
- An interest in improving quality
- Experience of audit work
- Sub-speciality training and experience
