## HL7 enabled emergency reporting 24/7/365 for CT, MR and Xray

- Unique NightHawk® portal workflow with instant 2-way communication
- Fastest workflow for radiographers and referrers
- Full communication audit trail from referral to report
- Enables most effective gatekeeping – saving cost
- Live, intelligent and interactive dashboard for all active patients

### Best in class performance:

#### Scale ✓

Reporting over 1200 exams for over 100 hospitals every night

#### Speed ✓

Average reporting time of just 26 minutes across all exams, with 70% in under 30 minutes

#### Stroke focus ✓

Average reporting time of under 15 minutes for acute stroke cases, including CT Angio, supported by AI

### Comprehensive

- Full neuro angio and peripheral angio cover, with dedicated pathways for acute stroke and major trauma
- Highest uptime of any emergency teleradiology service – back-up pathways for any scenario except total hospital internet blackout

### Flexible

Cover is adaptable to meet your needs:

- Hybrid cover alongside internal roster or other supplier
- Pilots available for 3 or 6 months

### Patient focussed

- AI enabled triaging for rapid identification of intracranial haemorrhage
- Full access to prior imaging for all patients
- Rapid peer review overnight

### Best value

- Clinical team not financially incentivised to say “yes”
- Clinical, operational and technical team on-site over go-live
- Radiographer CPD accredited training on NH portal
